District Number - 3461

District grants give Rotarians freedom in determining how to best spend funds donated to The Rotary Foundation in their district. Each Rotary year, districts may apply for one district grant, which can be used to support one or more projects, based on that district's interests and needs.

The Rotary Foundation funds district grants with District Designated Funds (DDF). Each year, your district may request up to half of your available DDF, which in turn represents half of your district's Annual Fund donations from three years earlier. This system, known as SHARE, enables Rotarians to benefit from the short-term investment of their donation dollars.

Applying for a district grant is an easy, online process. Note, however, that the application requires specific information about your spending plan, bank account, and account signatories, so it's best to have this information available before you begin.

Also note that district grant applications must be authorized by the district governor, district Rotary Foundation committee chair, and district grants subcommittee chair. Before starting this application, please ensure that your district governor has identified these officers and that the officers have registered with Member Access.

The old staff dorm of the south-east and electric box of the north-east of school campus has long being the dangerous spots of our school campus. For the kid to feel safe in school, and also to boost local development and cultivate the cultural value of the park, the school safety reform is now the most important issue of our school development. With train electrification and elevated railways, the sounds of trains and crossing signals have become part of the memory for Yuanlin Town residents. A new station called Yuanlin Jingsiou station – Railway Cultural Park was built on Jingsiou Elementary School campus in order to preserve these valuable memories and the cultural relic. Railway Cultural Park is located in the south-east of school campus, which was originally an old staff dorm. The location provides a great advantage in resource allocation and community development as it situated right next to Jingsiou Road. The facilities and cultural relic are constantly added to the park to show the emphasis of its educational value in cultural and creativity, and with the on-going development of the park, it is hoped to enrich and deepen the education content of this station. In future, the park will not only be a great outdoor classroom for kids to learn more about railway cultural, but also an excellent hideout place during the recess. The park also provides a recreational pace for the residents. In future, the alignment with Railway Holiday Market will further vibrate the community economy. Therefore, Railway Cultural Park is truly a multi-functional park that covers education, recreation, and economy and community development.</p>	Taiwan	1514	1514
